

MEETING MINUTES

Date:	15 July 2026
Location:	Videoconference
Name(s) and function(s) of the Commission representative(s):	Thomas Skordas, Deputy Director-General, DG CONNECT Kilian Gross, Director, Enabling and Emerging Technologies, DG CONNECT Peter Stuckmann, Head of Unit, DG CONNECT
Name(s) of the interest representative(s):	Serentschy Advisory Services GmbH
Subject matter:	Exchange of views on precision time synchronisation, optical quantum clocks, resilient positioning, navigation and timing (PNT), and international standardisation.
Main points raised and positions expressed:	•Serentschy Advisory Services presented precision timing as a strategic and geopolitical capability, using the Arctic as a case study. •Commission representatives outlined existing EU support for quantum-clock research and industrialisation. •The discussion covered technological maturity, future integration with European space and PNT systems, the international standardisation process, and cooperation with like-minded countries.
Conclusions:	The Commission will further assess the state of play on quantum-clock standardisation and relevant European and international participation.
