

EUROPEAN COMMISSION

## MEETING MINUTES

|                                                                     |                                                                                                                                                                                                              |
|---------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Date:</b>                                                        | <i>1 July 2026</i>                                                                                                                                                                                           |
| <b>Location:</b>                                                    | <i>Brussels, Belgium</i>                                                                                                                                                                                     |
| <b>Name(s) and function(s) of the Commission representative(s):</b> | <i>Paula Rey Garcia (Head of Unit ENER.C1)</i>                                                                                                                                                               |
| <b>Name(s) of the interest representative(s):</b>                   | <i>EPIA SolarPower Europe</i>                                                                                                                                                                                |
| <b>Subject matter:</b>                                              | <i>Discussion on the role of batteries in meeting AccelerateEU's estimated energy storage needs by 2030</i>                                                                                                  |
| <b>Main points raised and positions expressed:</b>                  | <i>Members of EPIA SolarPower Europe's Battery Storage Europe Platform discussed how to meet AccelerateEU's estimated need for 200 GW by 2030, and the role that batteries could play in achieving this.</i> |
| <b>Conclusions:</b>                                                 | <i>N/A</i>                                                                                                                                                                                                   |
