

MEETING MINUTES

Date:	30 June 2026
Location:	DG ENER, Brussels
Name(s) and function(s) of the Commission representative(s):	Margareta Djordjevic (Head of Unit, ENER B2)
Name(s) of the interest representative(s):	Coalition for Energy Savings
Subject matter:	Post-2030 energy efficiency framework
Main points raised and positions expressed:	• Interest to discuss the post-2030 energy efficiency framework • Discussion on the policy elements and scenarios presented in the 1st stakeholders workshop • Request to keep a high energy efficiency ambition in the post-2030 framework • Discussion on what are the objectives post-2030: energy independence, competitiveness, affordability, decarbonisation • For the Coalition, the target, the Energy Savings Obligation as well as the public sector provisions are important, the latter as EPBD does not ask specifically the public sector to “lead by example” • The Coalition feels that the discussion on energy efficiency can be countered by the push for more “data centres and energy intensive industries” • Need to find a narrative that supports the need for a strong energy efficiency framework after 2030
Conclusions:	N/A
