

EUROPEAN COMMISSION

MEETING MINUTES

Date:	<i>30 June 2026</i>
Location:	<i>Hybrid: Brussels and Luxembourg</i>
Name(s) and function(s) of the Commission representative(s):	<i>Renate Nikolay, DDG CNECT</i>
Name(s) of the interest representative(s):	<i>Craig Vosburg (MasterCard Chief Services Officer) and Mikael Svensson (MasterCard Vice President for Government Affairs)</i>
Subject matter:	<i>Exchange of views on developments in AI in payments, including fraud and risk management issues, the rise of agentic commerce and its interaction with the Payment Services Regulation (PSR), the Digital Services Act (DSA) and the AI Act.</i>
Main points raised and positions expressed:	• MasterCard: AI presents both opportunities and challenges in the payments sector. The company works with AI labs to monitor technological developments, which feed into internal risk management processes, including in relation to acquisitions. Managing innovation alongside risk remains an important issue. • MasterCard: on AI alignment in financial services, MasterCard indicated that it has made substantial investments in security infrastructure and plans to continue doing so. Fraud prevention remains a major priority across the financial sector, particularly as AI creates new opportunities for criminal misuse. Discussions with relevant stakeholders are ongoing to help protect the wider ecosystem. • Renate Nikolay: Consumer protection issues linked to AI-enabled commerce could potentially be addressed in the Digital Fairness Act, while remaining consistent with enforcement under the Digital Services Act. • MasterCard: characterised agentic AI as a further step in the evolution of digital commerce. It stressed the importance of preserving existing consumer protections, such as dispute

	<i>resolution mechanisms and anti-money laundering requirements.</i>
Conclusions:	MasterCard: <i>sees AI as both promising and risky. It is engaging with leading AI labs and investing strongly in AI for security and fraud prevention.</i> <i>The company views AI-driven commerce as a natural next step and wants existing consumer safeguards to continue to apply. More broadly, it called for a balanced EU approach that considers both opportunities and risks, and for caution before introducing additional regulation.</i>
