

EUROPEAN COMMISSION
DIRECTORATE-GENERAL FOR ENERGY

Directorate B – Just Transition, Consumers, Efficiency and Innovation
B.4 – Digitalisation, Competitiveness, Research and Innovation

MEETING MINUTES

Date:	16 July 2026
Location:	Hybrid meeting (in-person meeting at DG ENER headquarters + web conference with additional participants)
Name(s) and function(s) of the Commission representative(s):	Vincent Berrutto, HoU ENER.B4
Name(s) of the interest representative(s):	Siemens S.A./N.V.
Subject matter:	Exchange of views on digitalisation of electricity grids.
Main points raised and positions expressed:	Siemens briefly presented the company, namely the part that develops smart infrastructures. They subsequently presented their views on smart ‘output’ indicators that are able to measure the overall grid performance vs. ‘input’ indicators that are focusing on measuring the assets as inputs. Measuring outputs is essential. DG ENER presented the current initiatives on digitalisation with a focus on the Strategic Roadmap for Digitalisation and AI in Energy. ENER also mentioned the upcoming legal proposal on future proofing electricity bills. Siemens flagged the need to have clear and harmonised rules to access, manage and use energy-related data. Access to data is underpinning any digitalisation efforts. Interoperability is key. An additional point discussed was the human resources needed for the energy transition. ENER mentioned the upcoming LIFE project that will help DSOs to build capacity to digitalise grids.
Conclusions:	Siemens expressed their willingness to provide inputs to the relevant Commission initiatives and decision-making processes that would speed up the digitalisation of grids.
